V5.20010d Mini-Briefing: UK Opportunities for ICT & Security Investors

Q1 Who could become your UK customers?	Most UK purchasers are very open to a differentiated value proposition. Focus, positioning and timing are often key to success in any segment UK is the EU market most open to outsourced supply of ICT services with cloud offerings gaining traction, especially for e-commerce and research as service and security issues are resolved and/or offset by scalability with many generic back-office functions following At Vecta, we can help you understand UK supply chains and advise whether you can disrupt the established order or how you can find an effective entry position
Q2 Who are likely to be your competitors?	Today's leaders underestimate threats from new players. Clayton Christensen's lesson can be applied in many ways to provide better value from money than incumbent leaders
	The 80-20 rule for value focus is more valid than ever in the minds of today's value-conscious purchasers, including those in the public sector
	Any competitor with a cloud proposition will set the benchmark price for many services
	At Vecta, we compare your offer to those of competitors, identifying customer segments in which you can compete most effectively and the evangelists who can help
	Most III/ businesses are very open to value adding neutropehing. Cuescastid marks and inc
Q3 Who might be a business partner?	Most UK businesses are very open to value-adding partnerships. Successful partnerships are based on a mutual respect for what each party brings to the partnership, whether customers, experience, finances, people, reputation or technology
	Clarity of responsibility and reward is critical with clear and effective escalation lines in the event of challenges
	"Only do yourself what no one else will do for you" is often the starting point
	At Vecta, we profile potential partners against your specific interests and, after review, can facilitate partnership development
	The III/ has a constant 100 Hair consisting and the last of the la
Q4 Where is the best UK research?	The UK has over 100 Universities, many have world-class research groups and facilities. The UK's Research Assessment Exercise identifies the best research groups and their scale against broad disciplines such as Electrical/Electronics Engineering, Physics and Computer Science
	Like businesses, academics work best in clusters so group scale and connectedness are important
	Seasoned academics can appear expert in many subject areas but the key knowledge may be elsewhere
	At Vecta, we profile these leading groups against your specific interests and, after review, can facilitate partnership development
Q5 Where is the best UK location for you?	Choice of location requires a balance between the most stressed communications lines; customers, financiers, HQ, key partners, and research partners all need communication but between what levels, how frequently and in what mode?
	While most customers are likely to be in the South East, some end-user industries are concentrated elsewhere in UK and many types of business operations are more cost-effectively located outside the main population centres
	At Vecta, we help you work through the likely communications intensities and other considerations to identify and realise the optimal business locations for you

Contact us if you found this useful and/or would like a free and confidential introductory discussion of how we might help you
